- Design test cases and sets of test cases to cover test conditions.
- Identify necessary test data to support test conditions and test cases.
- Schedule test executions in order.
- Develop test procedures and other quality documentation: test plans, test cases, and status reports for management

TECHNICAL EXPERTIES:

- **Operating Systems:** Windows family,Basic knowledge of Linux
- **Programming:** JAVA, SQL.
- **RDBMS:** Oracle, My SQL
- **Frameworks:** Data Driven, testng
- **Testing Tools:** Selenium Web driver, Soap UI, Postman

- **Defect Tracking Tools:** JIRA
- **Others:** MS Excel, MS Word, MS Power Point

PROFESSIONAL EXPERIENCE :

- Working as Software Quality Analyst at Afour Technologies Pvt. Ltd, Pune from June 2019 till present.

EDUCATIONAL DETAILS :

- B.E (Electronics & Tele-Communication) from Solapur University in 2019 .

Project 1 :

Project Name : NueMD
Domain : Healthcare

Description:

NueMD offers a suite of cloud-based software and medical billing services for practices of all sizes. NueMD is an integrated practice management, medical billing, electronic health recording and appointment scheduling solution

Role / Job Responsibilities:

- Prepared Test Scenario, Test case design, and Review it.
- Understand the SRS doc and clarify the doubts with BA
- Performed Functionality Testing, Retesting and Regression Testing.
- Performed manual functional testing and constructed positive test scenarios as per requirements.
- Involved in extensive backend testing using SQL Queries to retrieve the data from the database and checked data integrity.
- Performed End-to-End testing manually and was associated with User Acceptance Testing.
 - Testing on staging environment. Have good knowledge of working in project with AGILE model.
 - Understand the SRS document and analyse the requirement.
 - Prepare the test cases from use cases
 - Responsible for Sanity testing.
 - Execute the test case to validate customer requirement
 - Involved in review test case and send review comments to colleagues.
 - Involved in the data validation for Billing system
 - Preparing daily report for the executions of the testcases.

Project 2:

Project Name : Carrier Access Billing System

Domain Type : Telecom Domain

Description:

We have multiple like billions of users using the service and each and every customer may have different requirements so keeping a track of all these usages manually can be a tedious and error prone task. To manage the usage in proper way we have developed a CRM according to our customer requirements.

Roles and Responsibilities:

- Identify and prioritize test conditions addressing product risks and features to be tested.
- Define specific tests that must be designed for that area.
- Design test cases and sets of test cases to cover test conditions.
- Active participation in weekly/daily status calls with the client.
- Wrote concise and well-written test documentation.
- Requirement gatherings from business, Test planning and Designing.
- Designing and Execution of E2E test cases for SIT .
- Requirement Analysis
- Identify necessary test data to support test conditions and test cases.
- Schedule test executions in order.
- Develop test procedures and other quality documentation: test plans, test cases, and status reports for management.
- Also responsible for preparing test proof document and defect report.

PERSONAL DETAILS:

- **Date of Birth:** 0 8 / 0 6 / 1 9 9 7
- **Nationality:** Indian
- **Language known:** English, Marathi, Hindi
- **Current Address:** Baner, Pune.

DECLARATION:

I hereby declare that all the information provided by me in this application is factual and correct to the best of my knowledge and belief.
